SUBJECT INDEX

Acetaldehyde, low temperature oxidation 106
Acetylene
  low temperature oxidation 99
  mass fractions 207
Acid rain 288
Adiabatic core temperature 73
Advanced Clean/Efficient Power systems 276, 289, 335, 340, 349
Advanced Clean Fuels 276, 294, 308, 335
Advanced Fuel Systems demonstration projects 333
Advanced Hybrid Gasification System 302
Advanced Power Systems demonstration 330
Advanced pulverised coal(APC) systems 312
Advanced turbine systems(ATS) 317, 324, 338
Aeroderivative turbines 323
AFC2WG Report 145
Agricultural wastes, FBC 261
Air pollution, coal, control technologies 325
Air quality 287
Air toxics
  coal 289, 328, 346
  motor vehicles 387
Alkanes
  comprehensive kinetic models 36, 39
  reduced kinetic models 70
Alkyl/alkylperoxy equilibria 78
Alkyl radical generation 77
Alternative fuels
  reformulated gasoline, atmospheric chemistry 387-417
  solid fuels, fluidised bed combustion 239-268
Aluminium membranes 340, 341
t-Amyl methyl ether, ozone formation 404
Arbitrary Lagrangian-Eulerian(ALE) method 86
Artificial intelligence 44
Asea Brown Boveri(ABB), FBC biolers 245
Ash, petroleum coke FBC 250
Assignment, ozone 396, 398, 414
Association-stabilization process, HNO decay 5
Atmospheric chemistry, alternate fuels 387-417
Atmospheric fluidized bed combustion(AFBS) 447
  coal, electric power generation 315, 316
Australia, coal waste fuels, FBS 251
Autoignition 26, 30, 64, 69
  alkanes 72
  chemical analysis 36
  delays 34
  end-gas 73, 80
  engines 79
  methanol 59
  pressure waves 89
Autoshredder residue, FBS 259

Balance of plant 145, 148, 150
Belgium, coal waste fuels, FBC 252
Benzaldehyde, ozone formation 395, 396, 399, 401
Bitumen 286
Blob breakup 185
Bond additivity-corrected Mller-Plesset fouth-order perturbation (BAC-MP4) 2, 14, 19, 20
  fluorinated hydrocarbons 461-468, 494, 496, 499, 500, 504, 506
Bond dissociation energies 14
  fluorinated hydrocarbons 462, 464
Bradley and Yeo model 65
Bray-Moss-Libby model 560, 561
Brayton cycle gas turbine 323
Bromine-containing compounds, flame suppression 455
Bubbling fluidized bed combustion(BFBC) 240, 241, 243, 251, 253, 255, 256, 258, 260, 422, 425
  AFBS 315
  PFBC
    bed expansion 429
    bubble growth and coalescence 427
    bubble formation 427
    Davidson model 426
    dimensionless parameters and scaling 433
    heat transfer 442
    mixing of gas and particles 434
    particle classification 431
    properties of single bubbles 425
    reactor models 443
    regimes of gas-solid flow 432
    slugging 430
    two-phase theory 4218
Butane, low temperature oxidation 101
Butene, low temperature oxidation 100
t-Butyl alcohol, ozone formation 403
Butyl radicals 40

Canada, coal waste fuels, FBC 252
Car fluff, FBC 259
Carbon dioxide, coal combustion 289, 347, 348
  control technology 328
Carbon dioxide mass fractions 206
Carbon monoxide formation in enclosure fires 198
  chemical-kinetic calculations of upper-layer reaction behaviour 210-214
  global equivalence ratio concept 199-210, 233-235
  hood experiments 199-210
  reduced-scale enclosures 214-233
  toxicity 199, 234
Carbon monoxide + hydrogen mixtures, oxidation 61
Carbon monoxide mass fractions 206
Carbonyl fluoride
  reaction kinetics 476, 498
  thermochemistry 463
Carboxyhemoglobin 199
CARS 80
Catalysis, coal 337
Caterpillar diesel engine 174-191
Ceramic heat exchangers 339
Ceramic membranes 340
Chain branching-thermal ignition 30-32, 42, 59, 63
Chain propagation 67
Channel combustion 116
Char nitrogen 248
Chatham boiler 245, 250
Chemical-kinetic calculations, upper-layer reaction behaviour 210
Chemical reactor theory 28
CHEMKIN 9
China
  coal 279, 280
  coal waste fuels, FBC 253
  demand for electricity 333
Circulating fluidized bed combustion(CFBC) 240-258, 433
Clean coal technology (CCT) 277

coal gasification 302, 319
coal-water slurry 296
international initiative 330
Climate Change Action Plan 276, 297, 342
Coal
advanced research programs 276, 334, 353
clean coal program 277
combustion and gasification 336
conversion and catalysis 337
materials 338
direct liquefaction 306, 310, 311, 334, 337, 350
electric power generation 311, 344
combustion turbines 323
emission control technologies 325
FBC 315, 344
integrated gasification combined-cycle systems 318
integrated gasification fuel cell systems 320
magnetohydrodynamic power generation 322
pulverized coal systems 312
F-T synthesis 306
gasification 298, 310, 334, 336
IGCC 318
IGFC 320
NO_x formation 247
N_2O formation 249
preparation 294, 342
pyrolysis 308, 350
refineries and coproduct systems 309, 311, 350
strategic planning 273, 342
clean coal program 277
electricity utility industry 280, 283
environment 287, 293
liquid and gaseous fuels 286
markets 279, 293
research and development 274
scenarios 291
U.S. DOE energy programs 275
technology demonstration and commercialization 329, 352
advanced power system demonstration projects 330
clean coal 330, 348
Coalbed methane recovery 296, 289, 342
Coal-derived gas
hydrogen production 303, 349
liquid products from synthetic gas 304, 350
methanol 305, 349
synthetic natural gas production 304, 349
Coal-liquid mixtures 295, 342
Coal mining/cleaning wastes, FBC
Australia 251
Belgium 252
Canada 252
China 253
France 253
Germany 255
India 255
Japan 255
South Africa 256
United Kingdom 256
United States 257
Coal-oil mixtures 296, 342
Coal tar 287
Coal-water slurry 296, 342
Cogeneration, coal-based 309
Coking 242
coal 279, 287
FBC biolers 243
Combustion equations, DNS 537
Combustion front 110
Combustion Power Company(CPC) boiler 243
Combustion speed, pressure 121
Combustion turbines 323
Combustion visualisation imaging system 177-179, 188
Commercialisation of fuel cells 145-151
Common-rail injection system 178, 181
Comprehensive kinetic models 36, 85
structure 38
validation 41
Computational fluid dynamic(CFD) models 79, 87, 532, 534
diesel engine 174
ignition and combustion models 185, 186
KIVA submodels 183-186
multicomponent fuel vaporisation 191
RGN turbulence model 187
sensitivity to intake flow 186
soot emission models 186, 189
validation 175
Computational singular perturbation(CSP) 51
Conditioned moment closure(CMC) model 375, 382
Continuous-flow stirred reactor(CSTR) 29, 30, 33, 42, 43, 53, 61, 64, 67
Coproducts, coal 281
Corrosion
advanced gas turbines 339
petroleum coke FBC 249
Cox and Cole alkane oxidation model 70, 74
Cyclohexane, low temperature oxidation 103
Cyclopentane, low temperature oxidation 103

Davidson model 426
n-Decane, low temperature oxidation 105
Delayed coke 242
Di-t-butyl peroxide decomposition 57
Diesel engine 80
Diesel engine CFD models 174
ignition and combustion models 185, 186
KIVA submodels 183-186
multicomponent fuel vaporisation 191
RGN turbulence model 187
sensitivity to intake flow 186
soot emission models 186, 189
validation 175
Diesel fuels 37
Diesel, syngas derived 306
Diethyl ether
low temperature oxidation 105
ozone formation 404
Diffusion of condensed particles 123
pressure 125
Dimethyl ether, ozone formation 404
Dimethyl ketone, low temperature oxidation 107
4,4-Dimethylpentene-1, low temperature oxidation 104
Direct coal-fired heat engines 313
Direct liquefaction of coal 307, 310, 337, 350
Direct numerical simulations(DNS) 533
flame ignition 565
flame vortex interactions and quenching 544
flame/wall interactions 567
flamelet models 541
flamelet structure 547
global structure 557
numerical methods 537
spatial resolution and physical scales 540
spectral interaction diagram 545
turbulent flames 535, 539
turbulent kinetic energy in flames 562
turbulent scalar transport in flames 561
Drop drag 185

Electric power generation
coal 283, 290, 311, 344
combustion turbines 323
emission control technologies 325
environment 287, 290
FBC 315
integrated fuel cell systems 320
integrated gasification combined-cycle systems 318
magnetohydrodynamics 322
projected requirements 281, 290
pulverised coal systems 312
utilization technology 280
liquified natural gas 284
nuclear power 285
oil 285
renewable energy 285
Electrostatic precipitator 325
Elutriation, bubbling beds 438
Emissions
coalbed methane 289
coal combustion 291
CO_2 288
control technology 325, 331, 346
N_2O 290
measurement instrumentation 176
models 174, 175, 181, 186, 189, 192
motor vehicle, reformulated fuel regulations 388
petroleum coke, FBC
NO_x 247
N_2O 248
SO_2 capture process 246
power plants 276
Enclosure fires, CO formation 198
chemical-kinetic calculations of upper-layer reaction behaviour 210-214
global equivalence ratio concept 199-210, 233-235
hood experiments 199-210
reduced-scale enclosures 214-233
toxicity 199, 234
ENCOAL Mild Coal Gasification 308, 310, 344
End-gas autoignition 73, 80, 89
Endoscope, diesel engine 177
Energy Policy Act 1993 273, 353
Engines
diesel, CFD models 174
ignition and combustion models 185, 186
KIVA submodels 183-186
multicomponent fuel vaporisation 191
RGN turbulence model 187
sensitivity to intake flow 186
soot emission models 186, 189
validation 175
reduced kinetic models 79
Engine knock 65, 79, 80
Entrained-flow gasification systems 289, 300, 302, 318
Entrainment, bubbling beds 438
Environment, coal combustion 280, 287, 290
emission control technologies 325
EPACT 353
Ethane
low temperature oxidation 99
mass fractions 207
Ethanol, ozone formation 403
Ethene, low temperature oxidation 99
Ethyl t-butyl ether, ozone formation 404
Ethyl fluoride, thermochemistry 464
European Union coal programs 274
Exhaust gas recirculation(EGR) 182
Exhaust emissions 387, 388
Exothermicity 71, 78
Expert Systems 43-46
Externally fired combined-cycle(EFCC) system 313, 332
electric power generation 343, 344
heat exchangers 339

Fast fluidisation 432
Fire deaths 198, 199
Fire extinguishers 454
halogenated 455
Fischer-Tropsch(F-T) synthesis 306, 338, 350
Flames
ignition 565
propagation 85-87
quenching 541, 544
radiation, NO scaling 375
speeds 553, 563
stretch 541, 543, 548, 558, 559
structure 37
suppression 455, 505
surface area 558
surface geometry and orientation 557
vortex interactions 538, 544, 552
wall interactions 567
Flamelet libraries 556
Flamelet models 192, 541, 551
Flamelet structure 547
complex chemistry simulations 554
models 551
strain, curvature and stretch 548
Flasover fire 198, 199
Flash-photolysis, H_2-NO 3
Flash photolysis-laser absorption, HNO decay 5
FLOW3D 228
Flow equations, DNS 537
Flow tubes 2
Flow velocity, diesel engine 175
Flue gas desulfurisation(FGD) 295, 312, 325, 326
Fluid coke 242
Fluidisation 422
fast 432
hydrodynamics 440
mixing of gas and particles 434
particle classification 431
turbulent 432
two-phase theory 428
Fluidised bed combustion(FBC) 239, 442
agricultural/food processing wastes 261
bubbling bed 240, 241, 243, 251, 255, 256, 258, 260, 315
coal mining/cleaning wastes 251
circulating 240, 241, 243-258
electric power generation from coal 314
municipal solid and industrial wastes 258
peat 257
petroleum coke 242
ash 250
biolers 243
corrosion and materials wastage 249
gas emissions 246
N_2O emissions 248
pressurized fluid bed, hydrodynamics 422
bubbles and bed expansion 425
elutriation and entrainment 438
heat transfer 442
internal surfaces in fluidised beds 440
mixing of gas and particles 434
particle classification, regimes and scaling 431
reactor models 443
pulp and paper waste 257

sewage sludge 260
technology 240
waste tyres 260
Fluidised bed gasification systems 298, 300, 302, 305
Fluorinated hydrocarbons 454
fire suppression 455
future mechanism refinement 505
reaction kinetics 467
BAC-MP4 ab initio predictions 504
C1 493
C2 499
H/O/F and hydrocarbons 468
RRKM analysis 503
reaction set 469-492, 507
thermochemistry 456-460, 506
BAC-MP4 ab initio predictions 466
C1 461
C2 463
H/O/F and hydrocarbon species 460
Fluoroethanes 454, 455, 499
abstractions 480, 500
decomposition 477, 500
insertions 479, 500
thermochemistry 463, 506
Fluoroethyl radicals
reaction kinetics 482, 501
thermochemistry 465
Fluoroethylenes
reaction kinetics 484, 502
thermochemistry 465
Fluoroethynes
reaction kinetics 487, 503
thermochemistry 466
Fluoroketones
reaction kinetics 487, 503
thermochemistry 466
Fluoroketyl radical, thermochemistry 466
Fluoromethanes 454, 455
decomposition 473, 493
hydrogen abstraction 474, 494m 495
metathetical reactions 474, 496
thermochemistry 461, 506
Fluoromethoxy radical, thermochemistry 463
Fluoromethyl radicals
reaction kinetics 475, 496
thermochemistry 461
Fluoromethylenes
reaction kinetics 475, 497
thermochemistry 462
Fluoromethylidyne radical
reaction kinetics 475, 498
thermochemistry 463
Fluorovinyl radical
reaction kinetics 486, 503
thermochemistry 466
Food processing wastes, FBC 262
Forced diffusion flame 157
Formaldehyde
low temperature oxidation 106
ozone formation 395, 396, 403
Fossil energy research and development 276, 278
Foster Wheeler biolers 243, 244
Fouling, petroleum coke FBC 250
Fourier Transform Infrared(FTIR) spectroscopy 7
Fragmented particles, kinetics of formation 123
France, coal waste fuels, FBC 253
Fuel cells 332, 345
commercialisation 145-151
integrated gasification systems 320
Fuel nitrogen, emissions and conversion in FBC 247, 248
Fusco soot formation model 190

Gas, coalbed methane 297
Gas emissions, petroleum coke 246
Gasification, coal 274, 298, 336, 345, 349
cogeneration 309
electric power generation, IGCC systems 318
products from coal-derived gas 303, 311
technology 300, 310
Gasoline 350
methanol-derived 305
reformulated 387, 389
ozone formation 402
Gas-particle mass transfer 436
Gas-solid flow, FBC 432
Gas turbines 323, 331, 338, 345
Germany, coal waste fuel, FBC 255
Global equivalence ratio(GER) 199-210
chemical-kinetic calculations of upper-layer reaction behaviour 210-214
gas species in reduced enclosure fires 216-233
prediction of CO production in enclosed fires 233-235
Global reaction rate 28
Global structure of turbulent premixed flames 557
Global warming, coal combustion 289
Gosman model 87
Gray and Yang model 62
Greenhouse gas emissions 276
coal combustion 289, 329
Grid models, fluid bed 447
Griffiths model 65
GRIMECH set 468
Growth of condensed particles 123
pressure 125

Halogenated fire suppressants 455
Halon 1301 454
Hartree-Fock method 14
HCT code 85
Heat conductivity 112, 121
Heat exchangers 339
Heat release rate(HRR) 219, 222, 223
prediction from reduced kinetic models 83
Heat transfer
DNS 538
fluidized beds 442
mesomicrolayer 157
turbulent flows 169
Heats of formation
C1 fluorinated hydrocarbons 461, 505, 506
C2 fluorinated hydrocarbons 463, 505, 506
Heavy oil 286
n-Heptane oxidation 68, 104
Hexane, combustion gases 217
High-frequency electric field 133
High-performance power system(HIPPS) 312, 313, 332, 434, 344
High-speed phenomena, theory 136
Hiroyasu soot formation model 186, 189
H/N/O-chemistry, theoretical aspects 1-23
bimolecular self-reaction 15
decay under NO-lean conditions 3
decay under NO-rich conditions 5
reactions with NO 16
thermal decomposition of CH_3ONO 7
Hollow metallic sphere, disintegration products 126

Hood experiments 199-210
chemical-kinetic calculations of upper-layer reaction behaviour 210-214
Hot gas cleanup technology, PFBC systems 300, 317, 339, 347, 348
Hu and Keck model 72, 74, 81, 83
Hydrides, NO reaction 3
Hydrocarbon fuels, CO formation 201, 202
Hydrocarbon low temperature oxidation 25-107
application of analytical methods 51
comprehensive kinetic schemes 36
derivation and reduction of kinetic models 43
experimental background 29
formal kinetic structures 62
reduced kinetic models
alkane oxidation 70
application to engines 79
thermal ignition and chain branching-thermal interactions 56
Hydrodynamics, PFBC 419-451
bubbles and bed expansion 425
elutriation and entrainment 438
heat transfer 443
internal surfaces in fluidised beds 440
mixing of gas and particles 434
particle classification, regimes and scaling 431
reactor models 443
Hydroelectric power 285
Hydrogen
abstraction from fluoroethanes 480, 500
abstraction from fluoromethanes 474, 494, 495
coal-derived 303, 349
enclosure fires 223
low temperature reaction with NO 1-3, 13
mass fractions 207
oxidation, kinetic model reduction 61
thermal reduction of NO 8, 11, 18
Hydrogen-air flames, NOx emissions 363, 367, 369, 373

Ignition
delays 34, 72, 85
diesel 178, 185, 186
engines 79
experimental methods 29
modelling 26, 27, 185, 186
phenomenology 30
solid fuels, theory 130
spontaneous 511, 63
thermal 56
thermokinetic models 62-70
turbulent streams 565
two-stage 33
Impulse radical mechanical compressions 126
Incremental reactivity, ozone formation 393-395, 397, 402
In-cylinder pressure waves 89
India, coal waste fuel, FBC 255
Indirect liquefaction of coal 309
Indirectly fired cycle(IFC) systems 313
Industrial waste fuels, FBC 259
Injection schemes 180-184, 191, 192
Injectors 175
Intake flows 186
Integrated gasification advanced-cycle system(IGAC), electric power generation 318, 343, 344
Integrated gasification combined cycle(IGCC)
coal-fueled 284, 298, 300, 302, 310
commercialisation 331
electric power generation 318, 343, 344
particle emissions 325
Integrated gasification fuel cell systems(IGFC), electric power generation from coal 320, 343
Isopropyl nitrate, low temperature oxidation 107
Isothermal kinetics 42, 51
Isothermal oscillations 28

JANAF 12, 21, 456, 460-465
Japan, FBC
coal waste fuel 255
petroleum coke 244, 245
Jet flame NO_x 365, 366
Jetting grid, modelling 447

Kinetic scales 154
KIVA code 175-177, 186-193, 566
KIVA-2 models 183, 185
KIVA II 65, 86, 88
KIVA-3 183
submodels 183-186
Knock 80, 89
Kolmogorov microscales 155, 166, 168

Lagrangian model 375, 381
Laminar flames 157, 162
modelling 85
NO_x 363, 364
quenching 542
Large Eddy Simulations(LES) 533, 535
Laser-induced ignition 30
Laser radiation, dispersal of shock wave front 136
Law-of-the wall models 567, 569
Least action 110
Leather waste, FBC 262
Light output 33
Lignites 287
LISP 44
Liquefaction, coal 311, 334, 337, 350
direct 306, 310
indirect 309
Liquefied natural gas, power generation 284
Liquid-phase slurry reactions 305
Liquid transportation fuels 304, 305
Low-dimension manifold 50
Low-emission boiler system(LEBS) 312, 343
Low emission vehicle 390, 393
Lumping 49, 67, 68, 392, 393
Lurgi gasification system 299

Magnetohydrodynamic(MHD) power generation, coal-fired 322, 346
Maximum incremental reactivity(MIR) 391-393
Maximum ozone reactivity(MOR) 391, 392
Membranes, coal-based systems 340
Mesomicroscale, turbulent combustion 156
Metallurgical coke 287
Methane
coalbed, recovery 289, 296, 342
coal gasification 301, 349
low temperature oxidation 98
mass fractions 206
ozone formation 395, 399
Methane-air flames, NO formation 381
Methanol
autoignition 59
in gasoline, ozone formation 403

production from synthesis gas 305, 349
Methanol-derived fuels 305
2-Methylbutane, low temperature oxidation 103
Methyl t-butyl ether
gasoline 389, 390
low temperature oxidation 106
ozone formation 404
2-Methylpentane, low temperature oxidation 103
Microscales of turbulent combustion 153-171
Minimum bubbling velocity 425
Molecular orbital theory, NO and O_2 2
Molton carbonate fuel cells 148, 150, 320
IGFC 321
Motor vehicle emissions, reformulated fuel regulations 388
Moving fixed-bed gasification systems 299, 300, 302
Mller, Peters and Lian model 68
Mullite 340
Multicomponent fuel vaporisation model 191
Multi-dimensional modelling, flame propagation and end-gas autoignition 85
Multi Solids Fluidised Bed(MSFB) 244
Municipal solid wastes, FBC 258

Nagle-Strickland-Constable soot oxidation model 186, 189
Natarajan and Bracco studies 86
Natural diffusion flame 162
Natural gas
combustion products 202, 204
power generation 283
reduced-scale enclosure 218-228
Negative temperature, ignition 34, 59
NISCO cogeneration project 243, 244
Nitramine combustion reactions 2
Nitric oxide(NO)
HNO decay 3, 5
HNO reactions 16
low temperature reaction with H_2 1-3, 13
thermal reduction by H_2 8, 11, 18
Nitrogen oxides(NO_x)
chemistry 363
coal combustion 288, 325, 326, 336, 346, 348
emissions 181, 182, 186, 193, 247, 248
formation in nonpremixed flames 363
flame radiation 375
laminar flames 363, 364
modeling summary 374
nonequilibrium 369
partial-equilibrium 372
prompt chemistry 381
scaling 365
turbulent jet flames 363
ozone formation 388, 391, 393
petroleum coke FBC 247
Nitrous oxide(N_2O)
coal combustion 290
emissions from FBC petroleum coke firing 248
emissions from sewage sludge FBC 260
Nonmethane organic gases 388, 389
Nuclear power 285
Numerical codes 85
Numerical modelling, ignition 27
Numerical simulations 532
turbulent premixed flames 537-572

Octane, low temperature oxidation 104
Octane boosters 38
Oil, power generation 285
Olefins, methanol-derived 305
One-dimensional modelling 85
Open-cycle combustion gas systems 322
Ordinary differential equations(ODE) 48, 50, 85, 88
Oscillatory cool flames 28, 30, 32, 63
Oscillatory glows 61
Oscillatory ignitions, CO and H_2 61
Oscillatory reaction, minimum kinetic schemes 51
Oxygen mass fractions 206
Oxygenates, gasoline 389, 402-405
Ozone
assignment 396, 398, 414
formation and organic reactivity 391
oxygenated gasoline components 402
simulation of urban formation 393
VOC emission 387, 395

Particle image velocimetry(PIV) 175, 176
Particle emissions 181-3, 193
coal combustion 288, 325, 327, 346
PC25TM power plants 146
Peat, FBC 257
Pentane, low temperature oxidation 102
Perfluoromethyl radicals, thermochemistry 462
Petroleum, power generation 286
Petroleum coke, FBC 242
ash agglomeration and fouling problems 250
biolers 243
corrosion and materials wastage 249
gas emissions 246
N_2O emissions 248
Phonon excitation 131
Phosphoric acid fuel cells 146, 147, 150, 320
Photochemical ozone creation potential 391
Photolysis, NO-H_2 reaction 3
Planar laser-induced fluorescence(PLIF) 369, 370
Plastics, FBC 259
Polyethylene, hood experiments 202
Polymer membranes 340
Poly(methyl methacrylate), combustion in enclosure fires 202, 217
Polyurethane foam, combustion gases 217
Potential energy surface(PES) 14
Powder mixtures 116
Power generation
coal 283
environmental issues 287
liquefied natural gas 284
nuclear power 285
oil 285
renewable energy 285
Premixed flames, DNS 537-571
Pressure
diffusion and growth of particles 125
solid fuel combustion speed 121
Pressurised circulating fluidised bed combustion(PCFBC) 433
Pressurised fluidised bed combustion(PFBC) 240, 421
coal 240, 284, 331
electric power generation 315, 317, 343, 344
emissions technology 325
SO_2 removal 327
hydrodynamics 422
bubbles and bed expansion 425
elutriation and entrainment 438
heat transfer 442
internal surfaces in fluidised beds 440
mixing of gas and particles 434

particle classification, regimes and scaling 431
reactor models 443
Principal component analysis 47
PROLOG 44, 46
Propane, low temperature oxidation 100
Propene, low temperature oxidation 99
Propionaldehyde, low temperature oxidation 106
Propogation reactions of QOOH 78
Proton-exchange membrane fuel cells 148, 150
Pulp and paper wastes, FBC 257
Pulse combustion 167
Pulverised coal systems 331
electric power generation 312
PyGasTM 303
Pyrolysis
coal 308, 350
wood 226
Pyropower boilers 243-254

Quasi Stationary-State Approximation(QSSA) 48
Quenching 541, 544

Radiation-affected flames 167
Radicals, ozone formation 401
Rapid compression machine(RCM) 88
Rate-controlled constrained-equilibrium theory(RCCE) 50
Reactivity adjustment factors(RAFs) 388, 391
Reactor models, fluid beds 443
REC code 85, 86
Recycling
municipal waste 259
paper 257
REDUCE 49
Reduced kinetic models 25-107
alkane oxidation 70
branching chain-thermal interactions 59
engines and related calculations 79
experimental background 29
hydrocarbon combustion 61
methods of derivation 43
thermal ignition 56
Reduced-scale enclosures(RSE), CO formation 214-233
Reformulated gasoline 387, 389
ozone formation 402
Refuse-derived fuel, FBC 258
Renewable energy 285
Renormalisation group theory(RNG), turbulence model 187
Repro-modelling 51
Rice-Ramsperger-Rice-Marcus(RRKM) theory 3, 5, 7, 16
fluorinated hydrocarbons 464, 468, 494, 499, 500, 503

Sal'nikov oscillatory scheme 53
SAPRC 393, 405
Scaling
bubbling beds 433
jet flame NO_x 365, 373, 377
Schlamms 253
Scott Paper boiler 245
Selective catalytic reduction(SCR) 326
Selective Non-Catalytic Reduction(SNCR) 248, 249
SENKIN 51
Sensitivity analysis 46
Sewage sludge, FBC 260
Sharp rods, breakdown of solid tatgets 138
Shell model 66, 71, 74, 86, 185
Shock loading 127
Shock tube 2
$H_2 + NO$ reaction 11
ignition 29
Shock wave, dispersal by laser radiation 136
Shot coke 242
Silicon carbide 340
Skin friction, turbulent flows 169
Slugging 430, 447
Smog chamber 392
Smoke inhalation 199
Solid fuels, alternative, FBC 239-268
Solid fuel burning 109
cylindrical shell, thermal pulsed load 110
ignition 130
kinetics of formation of fragmented particles 123
macroscopic phenomena 116
quantum mechanical approach 130
theory of high-speed phenomena 136
Solid oxide fuel cells(SOFC) 147, 150, 320, 345
IGFC 321
Solid waste, emissions 328
Soot formation model 186, 189
South Africa, coal waste fuels, FBC 256
Space-averaged quantities 552
Spatial differencing 86
SPEED 86, 87
Split injection 192
Spray model 184
Spray-wall impingement 185
SPRINT 75
Static cells 2
Steam, coal-generated 287
Sulfur, coal cleaning techniques 295
Sulfur-capture 241
petroleum coke FBC 246
Sulfur dioxide, coal-based power systems 288, 325, 326, 346
Surface tension 110-112
Surovikin soot formation model 190
Syngas 303, 338, 345
F-T process 306
liquid products from 304
methanol from 349
Syngas-air flame, NO production 373
Synthetic natural gas 298, 304, 349

Tacom diesel engine 191
Taylor microscale 155, 166, 168
Temperature distribution at surface of burning solid fuels 119
Temperature, GER correlations 209, 210, 213
Termolecular reaction 2, 7
Texas New Mexico CFBC 246
Thermal barrier coatings(TBCs) 339
Thermal explosion 126
Thermal feedback 52
Thermal ignition 28, 30, 31, 56
Thermal loading 110
Thermal runaway 54, 57
Thermochemistry, fluorinated hydrocarbons 456-460, 506
BAC-MP4 ab initio predictions 466
C1 461
C2 463
H/O/F and hydrocarbon species 460
Thermodynamic engine cycle model 80
Thermokinetic models 62
Thermokinetic oscillations 53

Timescales 48
Top dead centre(TDC) 88
Transition layer 114-116, 121
Transition state theory(TST) 3, 5, 16
Transport Disengagement Height(TDH) 439, 443
Transportation fuels 304, 305
2,2,4-Trimethylpentane, low temperature oxidation 105
Turbines, gas 323, 331, 338, 339, 345
Turbulence, diesel combustion 175, 187
Turbulent combustion
  classical microscales 154
  computation techniques 532
  direct numerical simulation 535
    flame ignition 565
    flame speed 563
    flame vortex interactions and quenching 544
    flame/wall interactions 567
    flamelet models 541
    flamelet structure 547
    global structure 557
    kinetic energy in flames 562
    numerical methods 537
    spatial resolution and physical scales 540
    turbulent scalar transport 561
  forced diffusion flames 157
  natural diffusion flame 162
  pulse combustion 167
Turbulent combustion model(TCM) 533-535, 537, 566
Turbulent flames 160, 165
  quenching 542
  speed 563
Turbulent fluidisation 432
Turbulent kinetic energy(TKE) 562
Turbulent model 167
Turbulent scalar transport in flames 561
Tyre-derived fuels, FBC 260

United Kingdom, coal waste fuels, FBC 256
United States
  coal strategy 273
  coal waste fuels, FBC 256
  energy programs and planning 275
Unsteady kinetic scales 168
Urban ozone formation, simulation 393

Vanadate corrosion 249
Vaporisation model 191
Velocity vectors, FLOW3D 229, 230
Vibrational frequencies 14
Vitiation, CO formation 198
Volatile organic compound(VOC) emissions, ozone formation 387, 388, 391
  incremental reactivity 395
  oxygenated gasoline components 403
  simulated urban 393

Wall impingements 185
Wang and Mou model 64
Waste disposal, coal 290
Waste fuels, FBC
  agricultural/food processing 261
  coal mining/cleaning 251
  municipal and industrial 258
  pulp and paper 257
  sewage 260
  tyres 260
Wave spray breakup model 184
Wind power 285
Wood combustion gases 217, 226
Wood-derived residues, FBC 258
Wood wastes, FBC 261
Worms 557

Zeldovich mechanism 186
Zero-dimensional analysis 37
Zero-dimensional models 57
  engine knock 80
Zeroth-order model for CO generation 199
Zirconia membranes 340, 341

Printed and bound in Great Britain by BPC Wheatons Ltd, Exeter
